

## 'Recipe' of Natural Colour RGB

Colour beam	Channel	Range [%]	
Red	NIR1.6	0	100
Green	VIS0.8	0	100
Blue	VIS0.6	0	100

The Natural Colour RGB is composed of the VIS0.6, VIS0.8 and the NIR1.6 channel data. The measured values should be calibrated to calculate reflectivity (including also solar zenith angle correction). The images should then be enhanced – linearly stretched - within the reflectivity ranges shown in the table.
